Two Sizes - One Great Trailer Design

Both the Cart-Away 1-yard trailer and the 1.75-yard trailer use quality components. All Cart-Away products are assembled with care in the USA. Both use the industry leading GearSaver™ knob for increased gearbox life. Both use the TandemFlex™ fenders to save on dented fenders and are powdercoated to protect the finish of the drum. The 1.75-yds MixKing uses a stronger pintle hitch system than the 2" ball hitch used on the 1-yard trailer.

Both trailers are a great investment and have the backing of the world's largest producer of trailer based concrete equipment, Cart-Away Concrete Systems, Inc.
